

i PRODUCT INFORMATION

AirgoLift

Wheel lifting device

Product description

The AirgoLift lifts and centers all types of car and light truck wheels up to 70 kg on the balancing machine.

One-hand operation and adjustable lifting height provide best possible flexibility for daily use.

Clamping and centering tools can be quickly removed from the adjacent, ergonomically positioned clamp holder to make the balancing process easier.

Product features

- AirgoLift – the ideal supplement to the wheel balancing machine
- Flexible adjustment of lifting height
- Fast operation of the lift by one hand only
- Intuitive operation with turning handle
- Ergonomic design
- Wheel weight up to 70 kg
- Compressed air connection
- Special holder for centering device
- Low height of 110 mm

The AirgoLift placed at a wheel balancing machine.
